

Christmas Cube Ornament

Materials

- Template
- Scissors
- Glue stick
- Family holiday photos
- Colourful ribbon

A Helpful Tip From Willie Win!

Stick a toothpick through one of the corners of your cube ornament to help stick down the tabs from the inside of the cube!

Directions

1. Select 6 Christmas photos of you and your family and cut them down so they are 2 inches on each side. Using a glue stick, paste your pictures to the template's squares.
2. Let it dry
3. Cut around the template. Be sure not to cut off the tabs because they will hold your ornament together!
4. Fold the cut out template on each line
5. Using a ribbon or string, create a loop with a knot to hang your ornament
6. Apply a glue stick to all tabs and assemble your cube ornament. Before closing the top of the ornament, glue the knotted end of your ribbon loop to the inside of the cube using tacky craft glue.
